Welcome to... https://pacs.ihn.org/hrs

Faster report/image turnaround
Reports and images are available as soon as they are completed. You can access the system, read the report, view the images, and use them to continue patient care immediately.

Improved report/image availability
Not only are the reports available immediately, they are also available wherever they are needed, eliminating the need to fax or courier film. You can view all of your patients’ information from the office, the hospital, or even from home.

Improved patient satisfaction
You are able to pull up reports and images while the patient is in your office, allowing them to view the images for themselves.

Key Benefits
Faster report/image turnaround
Reports and images are available as soon as they are completed. You can access the system, read the report, view the images, and use them to continue patient care immediately.

Improved report/image availability
Not only are the reports available immediately, they are also available wherever they are needed, eliminating the need to fax or courier film. You can view all of your patients’ information from the office, the hospital, or even from home.

Improved patient satisfaction
You are able to pull up reports and images while the patient is in your office, allowing them to view the images for themselves.

Find a Patient
To search by Patient Name or MRN click the icon if present.
Top left corner of screen will have drop down to search Patient Name or MRN.
Once you have found the patient and image you want to view, double click with the mouse on the line.

To View an Image
Click and drag the small image from row down to the window you want it in.
To change images simply click and drag a different image into the large window.

Compare Images Side by Side
Click on the portion of icon in the top right of the screen.
The grid will appear which lets you choose how many images you see on your screen. When the number you want is highlighted, left click with your mouse.
Highlight the two boxes on the top left to view images side by side.

Zoom and Pan Image
Right click on the image with mouse to activate the menu (same as Zoom and Pan).
Select Interactive Zoom.
From this menu you may select Interactive W/L to manually adjust the film.
You may also select a preset window if it is available for that film. The preset windows can be found just below Interactive W/L if available.

Scrolling through Images
Images such as CT and MRI can be scrolled through. To do so, left click to select an image. Roll the mouse wheel or use the up/down arrow keys. All linked images will scroll together.
To link/unlink images, click on the Link icon. This will stop or start images from moving together.

View Text Reports
To view text reports associated with images, click on the Documents icon at the top corner of the screen.
When finished, click on the ‘X” in the top right corner.

Exit HRSD
To exit, click on your name in the top right-hand corner and select quit. This will close the entire program.
